MORTEX
MORTEX PRODUCTS, INC.

E-40 Weatherized Universal Air Handler

Standard Features

- **Unique Design**
  - Allows placement of the air handler and condenser in separate locations
  - Rugged, insulated "Snap-Together" construction
  - Compact Design
  - Small footprint—Fits on narrow lot lines
  - Can be placed against the home—No Setback!
  - Low ductwork attachments—no need for elbows digging to connect ducts

- **Easy to Install**
  - Sweat Fit system allows quick and easy installation
  - "Spin—In" fast ductwork connections.
  - Light weight—easy to carry and position
  - Optional 5-20 KW heat strips and turn elbow for any application
  - Heat Pump and A/C compatible

- **Quiet Operation**
  - Allows placement of the air handler near bedrooms, etc.
  - Double Wall insulated cabinet isolates blower noise

- **Efficient/Effective Operation**
  - Superior airflow—delivers the performance needed in challenging settings
  - Double wall insulated cabinet reduces air leakage and condensation ("sweating")

- **Easy to Service**
  - Upfront controls, wiring and slide out blower cabinet makes service a breeze
  - Plug in heat strip, blower deck wiring
  - Easy to access coil for cleaning and maintenance
