

MEETS M1 STANDARDS

- SEER2
- EER2
- HSPF2

**Certified to
UL60335-2-40**

Key Features

- Metering devices for all applications (piston & TXV)
- Available with sweat fit
- Built-in Strainer for coil protection
- UL Listed and leak tested to 500 psi
- Dual condensate drain connections
- Installation kit contains drain hose, fittings and Installation Instructions

Standard Features

- Designed and labeled for installation only in Mobile Home applications per DOE 2023
- Wide range of AHRI-rated applications
- Applications for A/C and Heat Pump
- 5 Year Parts Warranty
- High strength durable packaging for secure storage and handling
- Optional factory installed TXV's
- A2L RDS for R-32 or R-454B

Manufactured Housing 96, 97, 98 Series Coils

96 Series

Fits All Furnaces, Coils up to 18.5 Inches Tall

97 Series

Fits All Furnaces, Coils up to 20 Inches Tall

98 Series

Fits All Furnaces, Coils up to 22 Inches and Taller

Products meet UL60335-2 - 40 4th edition

Manufactured Housing 96, 97, 98 Coils

Coil Selection Guide

Selection steps:

1. Identify the needed capacity, A/C or H/P, and Local/Regional Standards requirements (SEER2, EER2, HSPF2) - see example below*
 - A. Example—Nominal 3 Ton
 - B. Example — A/C only
 - C. Example—14 SEER2, No EER2 requirement
2. Identify the outdoor unit to be used-Brand, Model and Refrigerant (New A2L Refrigerants require a specific TXV for each type-R32 or R454B).
3. Identify the mobile home furnace to be used or installed
 - A. Determine furnace coil cabinet height available (Mortex™ cabinet extensions available for EB Series downflow models)
 - B. Determine furnace coil cabinet depth available. Mortex™ builds coils with 2 different pan depths for additional capacity. The exclusive new deeper pan requires the addition of cabinet extension in some applications. (Mortex™ cabinet extensions available for many models).
4. Select the correct AHRI-rated coil

(See @ www.ahridirectory.org)

**Mortex™ has hundreds of coil options available for all applications
Mortex™ maintains thousands of AHRI ratings. Mortex® has the coil
to fit your needs.**
